

Trimble ID User Guide

5-Step User Journey

- 1 Receive Invitation:** Look for the automated “Trimble Identity” email to start your setup.
- 2 Secure Identity:** Create your account using your work email and a strong password that follows the organization policies.
- 3 Multi-Factor Setup:** Enable Two-Step Verification (2SV) to protect your profile or configure other available MFA option.
- 4 One-Time Linking:** Sign in with your old password one last time to link your existing Construct account with Trimble ID.
- 5 Secure Access:** All future logins will use your secure email and 2SV code.
